About SPACECOM

Spacecom (TASE: SCC) is the proprietary owner and operator of the AMOS satellite fleet. Its most recent addition, AMOS-17, is a fully digital and advanced High Throughput Satellite (HTS) further expanding Spacecom's reach over Africa, Middle East and Asia.

Since 1992, the company has been a satellite services innovator, providing satellite connectivity, network optimization technologies, consultation and tailored solutions to suit customers' specific needs and drive business growth.

Spacecom's solutions include managed services, professional services, turn-key solutions, Cellular Backhaul,

trunking solutions as well as broadcast, data and broadband satellite services. Spacecom's customers include ISPs, telecom and MNO operators, DTH / OTT operators, network integrators and government agencies.

Its strategically located satellites AMOS-3 and AMOS-7 co-located at 4°W, AMOS-4 at 65°E, and AMOS-17 located at 17°E, provide reliable coverage over Africa, Asia, Europe and the Middle East.
