

GLOBAL COMMUNICATION SERVICE PROVIDER OPERATING ITS OWN SATELLITE FLEET

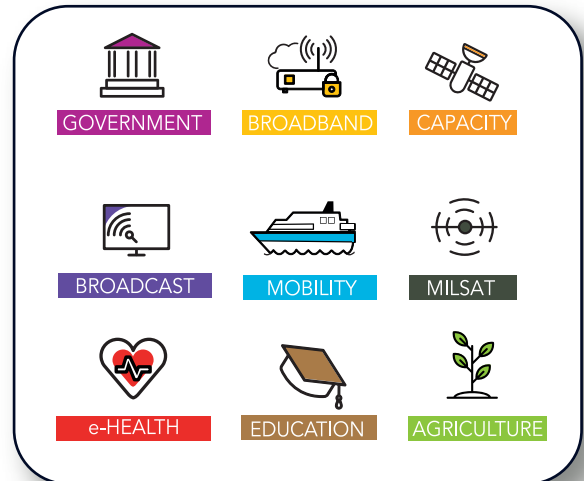

Spacecom is focused on both the Enterprise and Government business segments (B2B & B2G).

Spacecom is the owner and operator of the well-known AMOS satellite fleet. The company's innovative and high-quality communication services add value throughout the entire value chain delivering superior value to customers. Operating its own and self-designed satellites, the "AMOS" fleet, Spacecom provides significant flexibilities and capabilities delivering the highest value to customers.

Our Solutions

The company is fully committed to delivering superior connectivity solutions to businesses, organizations, governments and agencies enabling them to enjoy reliable, professional, cost effective and high-quality Communication and Internet Services.

As an End-to-End Communication and Connectivity Satellite Services provider, we are dedicated to creating and deploying the most precise communication packages required by our customers. Over the last three decades, since 1992, Spacecom has acquired vast experience and significant know how in designing, operating, servicing, and marketing a wide range of satellite-based Communication Services.

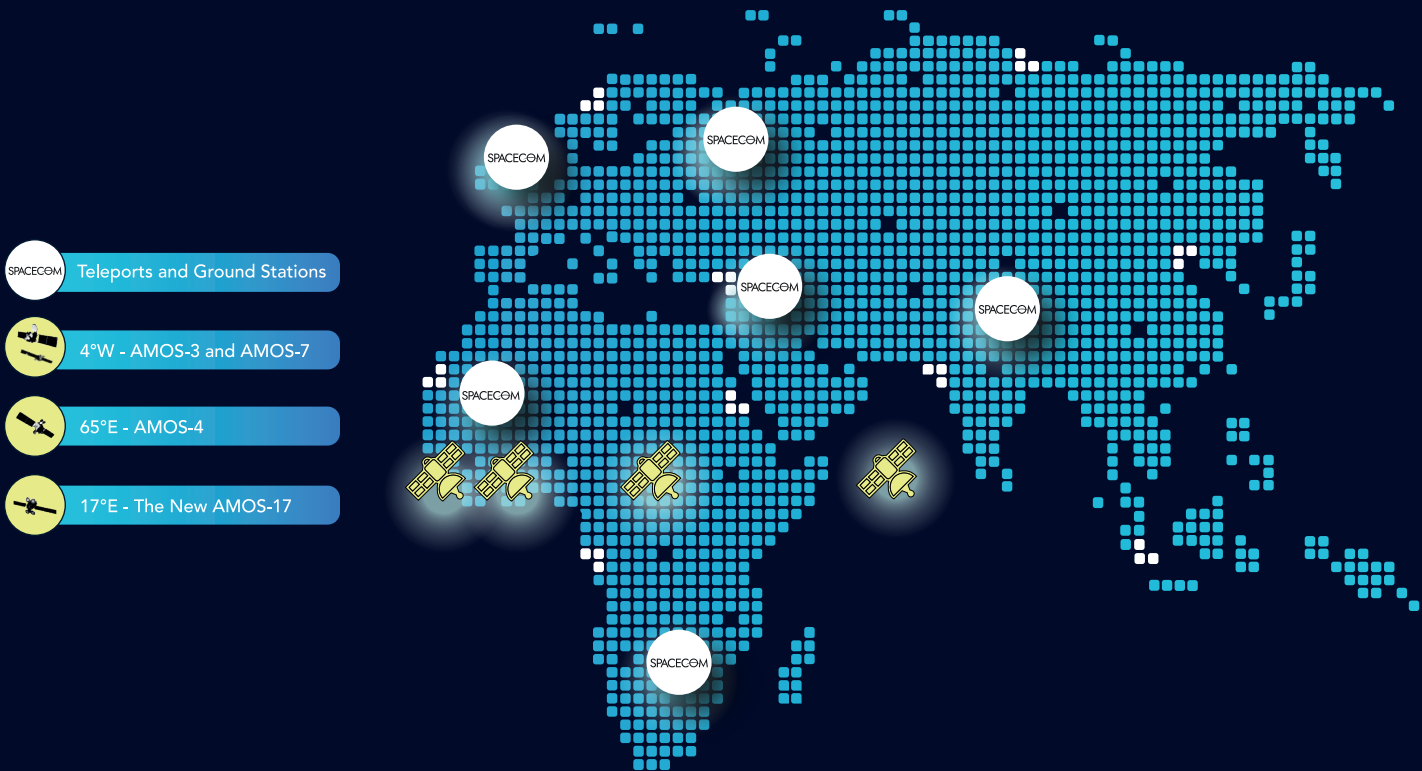

We Offer

We work side-by-side with customers in a partnership approach, to build successful solutions and strong relationships. Together, we tailor comprehensive connectivity programs which include:

- Innovative Managed Services
- Cellular Backhaul
- Trunking Solutions
- Range of Internet, Broadcast, Data, and Broadband Satellite Services
- Satellite pure Capacity
- Network Optimization Technologies
- Value-Added Services and Platforms
- Professional Packages, Turn-Key Solutions
- Consulting
- Project Management all the way to on the ground Installation and Logistics

Strategically located satellite fleet covers Africa, Asia, Europe, and the Middle East:

Our comprehensive offerings include:

- **NationSat** – A private ‘virtual’ satellite for an entire nation.
- **Spacecom PLUS** – A family of advanced Managed Services and Value-Added Communication Services. An inclusive solution to meet all network communication needs. The End-to-End technical solutions together with a professional team, work with the client to develop and deploy all their communication needs.
- **Digital Community Platform (DCP)** – An “always on” platform comprised of independent, smart and flexible ground segments including local ICT infrastructure, on / off grid power, and applications to supply Internet Connectivity and designated solutions such as e-Health, e-Education, e-Govt and more. DCP is designed to support the most remote and (sparsely populated) as well as urban communities lacking infrastructure connecting to the national networks.
- **Broadcast Video Services Platform** – An all-inclusive DTH FTA platform whose content reaches tens of millions of viewers throughout Africa while also providing Added Value with Channel Monitoring, Playout and other comprehensive services, Private NOC, Teleport Services, and more.
- **Pure Capacity** – Spacecom offers Pure Capacity on Amos satellite fleet to meet the growing needs of Data, Telephony and Internet Broadband in the Middle East, Africa, Asia and Europe.
- **Professional Services** – Our comprehensive offerings include a full array of Professional Services such as Project Management, Logistics, End-to-End Solutions and Consultancy.
